

SODO Station

SODO station construction was part of the building of Central Link. SODO station is a street-level station with side platforms. Riders can access the station from the new bicycle/pedestrian trail parallel to the light rail route and from Lander Street south of the station.

A new bicycle/pedestrian trail has been built alongside the light rail route and busway that will connect with the Mountains to Sound Greenway trail.

Mode

Light rail

Highlights

Start of service: 2009

Projected ridership: 1,700 daily boardings in 2020

Public art

"Made in USA" by Michael Davis honors the SODO district's industrial past by utilizing "tools of the trade" to create a sculpture and seating benches.
